**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

Temperatures are likely to be a couple of degrees higher than shown. UV levels will be very high so sun protection is essential.

Forecast for Monday 14 Jun 2021

Weather: After a clear start and some early sunshine, cloud is likely to move over the National park from around 8am. During the morning it may become quite low, covering the summits at times, and bringing some hill fog and drizzle. It will also be breezier than on Sunday. The cloud will lift and break up during the afternoon and winds become light again, to give some late warm sunshine.

Maximum wind: 15 mph with gusts of 20 mph on the summits in the cloudy spell during the morning.

Chance of cloud free mountain/hill tops above 600m: Before 8 am 100%
From 8am to 1500 40% with cloud often obscuring hills above 300m.

Visibility: Good visibility at low levels, but poor on hills above 300m above sea level, where fog down to 100m is likely.

Temperature: **Valleys:** 12 C at dawn, rising to 22C in the late afternoon.
At 600m: 8 C at dawn, rising to 12 C in the late afternoon.
Freezing level: Well above summits.
